

A complex network diagram on a grid. The grid consists of nodes (small circles) and edges (lines). Nodes are colored in various colors: red, green, blue, orange, purple, and yellow. Edges are colored in various colors: red, green, blue, orange, purple, and yellow. Several clusters of nodes are highlighted by black outlines, forming a complex shape. The clusters are interconnected by edges. The overall structure is a dense network of nodes and edges, with several clusters highlighted by black outlines. The clusters are interconnected by edges, forming a complex shape. The overall structure is a dense network of nodes and edges, with several clusters highlighted by black outlines.
